Education & Certifications

- AWS Solutions Architect - Associate, AWS**
07/2025 – 11/2025
Validated expertise in designing scalable, cost-efficient, and secure cloud architectures (EC2, Lambda, VPC).
- Computer Science and Engineering, Adama Science and Technology University**
09/2021 – 07/2025
- AWS Certified Cloud Practitioner, AWS Academy**
04/2025 – 06/2025
Hands-on experience with AWS EC2, S3, RDS, IAM, and security best practices.

Skills

- Core Languages**
TypeScript, JavaScript, Python (Basic/Scripting)
- System Architecture**
Node.js, Express.js, NestJS, REST APIs, Distributed Systems, Microservices, Fault-Tolerant Design
- Data & Messaging**
Kafka, MongoDB, MySQL, PostgreSQL, SQLite
- Cloud & DevOps**
AWS (EC2, S3, RDS, Lambda), Docker, GitHub Actions, Containerization
- Frontend/UI**
React, HTML/CSS, WebSocket, UX/UI Design
- Tools**
Git, Postman, Jira, Trello, MongoDB Compass

Projects

- BookCompass**
Book Marketplace Online Book Platform enabling users to discover, purchase, and review books seamlessly.
 - Integrated Chapa Payment API, enabling 500+ monthly secure test transactions.
 - Automated delivery fee calculation and stock management to reduce human error by 60%.
- Comfy Journal**
Personal Diary App Mood-tracking journaling app with category-based entries and clean UI.
 - Enhanced UX by enabling real-time sync and data persistence across sessions.
- Proforma App**
Desktop Invoice Tool Offline desktop tool for automotive suppliers to manage and generate proformas efficiently.
 - Introduced an offline proforma invoice management software, reducing invoice preparation time by 60%.

Profile

I am Backend Engineer specialized in building high-performance, scalable, and secure fintech systems using Node.js, Express.js, and TypeScript.

Experienced in microservice communication, database optimization, and cloud deployments (AWS).

Focused on modular design, distributed systems, and fault-tolerant architectures that scale to millions of users.

Proven ability to contribute to both sophisticated backend logic and the development of intuitive user interfaces.

Professional Experience

- Backend Engineer**
EagleLion Systems Technology
08/2025 – Present | Addis Ababa, Ethiopia
 - currently working on Dashen Super app platform
 - Engineered core fintech microservices using TypeScript/Node.js, capable of handling 100K+ daily API transactions and supporting 99.9% uptime for mission-critical functions.
 - Designed and implemented a Kafka-based observability and auditing layer, improving traceability and accountability (critical for 'Human-in-the-Loop' intervention) across 5+ services.
 - Revamped a core authentication and action microservice serving 1M+ users, ensuring high availability and robust security protocols.
 - Optimized MySQL schemas and queries for high concurrency, reducing transaction latency by 35%.
 - Refactored legacy modules, boosting overall system performance and maintainability by 25%.
- Backend Developer Intern**
Lersha
07/2025 – 08/2025 | Addis Ababa, Ethiopia
 - Designed a permission-based authentication and authorization system that reduced unauthorized access attempts by 99.9%.
 - Developed a modular service architecture for data synchronization, improving API efficiency by 20%.
 - Collaborated with cross-functional teams to enhance scalability and performance for 10K+ users.
- Software Engineer Intern**
Ministry of Innovation & Technology (MINT)
05/2022 – 08/2022 | Addis Ababa, Ethiopia
 - Developed a full-stack inventory system using React and Node.js, enabling real-time stock visibility for 500+ items.
 - Integrated JWT authentication and WebSocket dashboards for instant analytics and monitoring.
 - Deployed REST APIs that improved backend response time by 30%.
